

Task: Testing for Mahfil App

Task 101

Section	Sub-Section	Test Case ID	Test Case Description	Test Data	Expected Results	Actual Results	Screenshots	Remarks	
1.User Authentication:	Sign in	1	Should be user friendly and easy to find		Easy to find	not easy to find easily			
		2	phone number border should not be over written		perfect size	perfect size			
		3	Should not exceed phone number disits	1621296671	shouldn't take over 10 disits After +880	Doesn't take			
	OTP	4	otp should be come in time		shouldn't be late	came within 10 seconds			
		5	Check the Otp can auto generated		Auto generate	Auto generate			
		6	Check the system can generate a one-time password currently		can genarate	can generate			
		7	Test the length of the generated OTP to ensure it meets the specified requirements.		ok	ok			
		8	Check that the OTP is generated within the expected time frame		time shouldn't be exceed	don't exceed time			
		9	Test the delivery methods (e.g., SMS, email, app notification) to ensure OTPs are sent promptly and reliably		promptly and reliably	is promptly and reliably			
		10	Verify that OTPs are sent to the correct recipient (e.g., the registered user's phone number or email address)		ok	ok			
		11	Test scenarios where users enter incorrect OTPs to ensure appropriate error handling and feedback.		shouldn't take submit and show wrong digits	shows wrong disits			
		12	Verify that OTPs expire after the specified time period and cannot be reused.		should be expire	expires			
		13	Test the user experience of entering and verifying OTPs across different devices and platforms.		ok	ok			
		14	Test the user experience of entering and verifying OTPs across different deves and platforms.		ok	ok			
		15	Validate that clear instructions are provided to users regarding OTP entry and verification		clear instructions are provided to users	ok			
		16	Test scenarios where OTP generation or delivery fails due to system issues or user input errors.		delivery fails due to system issues or user input errors.	don't fail due to system issues			
		17	Verify that appropriate error messages are displayed to users in case of OTP failure or expiration.		should be expires	expires			
		18	Test the system's ability to handle a large volume of OTP requests simultaneously.		should handle	can handle			
	Name	19	Check the field is required or not.	blank	shouldn't be take submit	can't submit			
		20	Check the field only accepts number or not.	1234	shouldn't be take submit	can submit			
		21	Check the character length of the name.	akkkkkkkkkkk kkkkkkkkkkkk kkkkkkkkkkkk kkkkkkkkkkkk kkkkkkkkkkkk kkkkkkkkkkkk kkkkkk	shouldn't be take more than 50 words	can submit with more than 50 words			
		22	Check the field only accepts special characters or Partial acceptance.	!@#%&'()* _+`	shouldn't be take submit	can submit			
		23	Check the field with Valid Name.	tasmia Khan	shouldn't be take submit	can submit			
		24	Check the name field Accepts with character & number combinations.	tasmia123	shouldn't be take submit	can submit			
		25	Check the space timing of the before & After name.	tasmia khan	shouldn't be take submit	can submit			
	Email	26	Test the system behavior when the mailbox is empty.	blank	shouldn't be take submit	can't submit			
		27	Test the system behavior when the mailbox is almost full (approaching its storage limit)		should be take submit	can submit			
		28	Test the system behavior when the mailbox is completely full (reaches its storage limit).		shouldn't be take submit	can submit			
		30	Sholdn't be submit without @gmail.com shouldn't be take a submit of invalid email		shouldn't be take submit shouldn't be take submit shouldn't be take submit	can't submit can't submit can't submit			
	Log out		Test the system's ability to recover from errors related to a full mailbox, such as freeing up space or providing options for users to resolve the issue.						
			Verify that the user is successfully logged out when clicking on the logout button		should br able to log out	can log out			
			Test whether the session is properly invalidated upon logout		should be properly invalidated	is invalidated			
			Verify that attempting to access protected pages after logout requires reauthentication.		should be protected	is protected			
			Confirm that all user-specific data (such as preferences, settings, or temporary data) is cleared upon logout.		should be cleared	is clear			
			Check that any unsaved changes made by the user are not retained after logout.		ok	ok			
			Ensure that sensitive data (such as authentication tokens or session identifiers) are invalidated upon logout.		ok	ok			
			Verify that the system does not allow access to restricted functionalities or pages after logout.		ok	ok			
			Test the logout functionality under multiple concurrent user sessions to ensure it works effectively in a multi-user environment.		ok	ok			
			Check for any race conditions or inconsistencies in session management during simultaneous logouts		ok	ok			
			Validate that the login functionality works consistently across different web browsers and devices		ok	ok			
	Password recovery function		should have password recovery function		ok	ok			
2.verify that content categories:	waz		should be accessible . should be correctly organized.		ok should be feature separatly	ok no feature separatly			
	nasheed		should be accessible . should be correctly organized.		ok ok	ok ok			
	tlawat		should be accessible . should be correctly organized.		ok ok	ok ok			
	Islamic shorts,		should be accessible . should be correctly organized.		ok should be feature separatly	ok no feature separatly			
	short films		should be accessible . should be correctly organized.		ok should be feature separatly	ok no feature separatly			
	halal documentaries		should be accessible should be correctly organized.		ok should be feature separatly	ok no feature separatly			
	funny videos		should be accessible should be correctly organized.		ok should be feature separatly	ok no feature separatly			
			should be correctly organized.		ok	ok			
			should function without any issues and correctly.		ok	ok			
			should function without any issues and correctly.		ok	ok			
3. Video Streaming:	pause		should function without any issues and correctly.		ok	ok			
	10 sec back		should function without any issues and correctly.		ok	ok			
	10 sec after		should function without any issues and correctly.		ok	ok			
	stream bar flexible		should function without any issues and correctly.		ok	ok			
	sound mule		should function without any issues and correctly.		ok	ok			
	sound unmute		should function without any issues and correctly.		ok	ok			
	sound level up/down		should function without any issues and correctly.		function should be avialable	no feature separatly			
	full screen off/on		should function without any issues and correctly.		ok	ok			
	playback speed		should function without any issues and correctly.		ok	ok			
	subtitle		should function without any issues and correctly.		ok	ok			
4. Unique Video Content:	quailty		should function without any issues and correctly.		ok	ok			
	videos load quickly		should function without any issues and correctly.		ok	ok			
	videos load smoothly		should function without any issues and correctly.		ok	ok			
	autoplay		should function without any issues and correctly.		ok	ok			
	unique with Islamic principles		should function without any issues and correctly.		ok	ok			
	aligns with Islamic principles.		should function without any issues and correctly.		ok	ok			
	5. Download Functionality:	download	should function without any issues and correctly.		should be able to download only if the users is avialable	ok			
	6. Search and Filters:	specific content.	should function without any issues and correctly.		ok	ok			
		category, date, or popularity	should function without any issues and correctly.		ok	ok			
	7. User Interaction:	like	should function without any issues and correctly.		ok	ok			
	comment	should function without any issues and correctly.		ok	ok				
	share	should function without any issues and correctly.		ok	ok				
	notification for namaz time	should function without any issues and correctly.		ok	ok				
	notification for new contents	should function without any issues and correctly.		ok	ok				
8.Performance Testing:	app's performance	should function without any issues and correctly.		ok	ok				
	during video playback	should function without any issues and correctly.		ok	ok				
	downloading.	should function without any issues and correctly.		should be able to download only if the users is avialable	ok				
	loading video content	should function without any issues and correctly.		ok					
	responsiveness	should function without any issues and correctly.		ok
